Back-to-Back Lab Table

Available widths:

48", 60", 72", 84", 96"

Available depths:

30", 36"

Formaspace FLX is a component welded, steel-framed lab bench that ships knock-down.

This bench is a game-changer for the industry because it was designed & engineered specifically to address common challenges in the lab environment, including wire management troughs and routing service lines from above or below. Single configuration parts are designed to be universal for ease of use and installation.

The FLX meets these challenges with ease of service routing and three wire management troughs for clean wire routing.

A 2nd user can be added with only the addition of a work surface and two legs. The FLX system will help reduce cost in both freight and installation while maximizing space & efficiency. Labs with FLX can be repurposed and reconfigured quickly & easily. Each user side is height adjustable individually.
