

FORMASPACE

CASEWORK CATALOG

LABORATORY CASEWORK

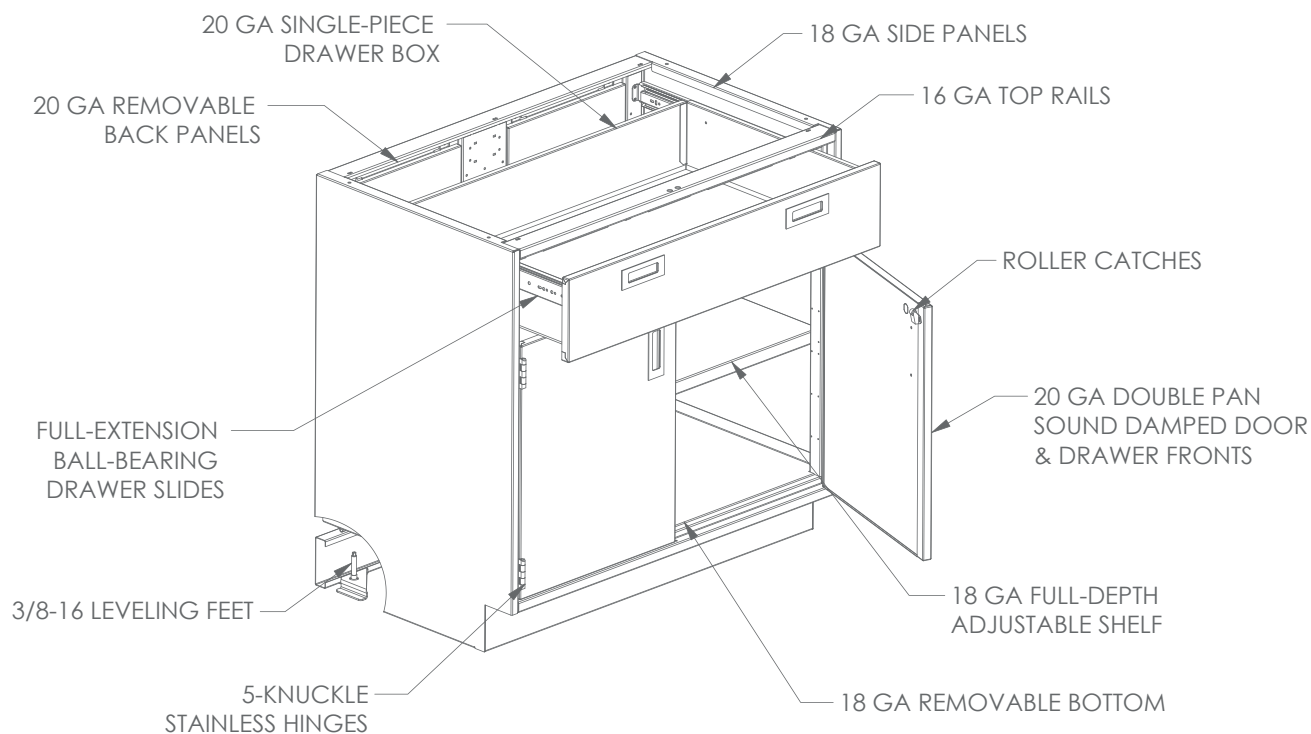

We've been working with lab managers and lab architects since 1981, and we design and manufacture made-to-order furniture for every lab's unique requirement. In addition to modular lab benches, the casework is one of the main players when furnishing a lab, as they go along the wall and offer a stable solution to any lab application.

At Formaspace the casework offerings can be fabricated to any specification and made to fit equipment, tools, shelving and technology. The casework can be built with varied materials and powder coatings for the steel frame. Contact us today for your custom casework project.

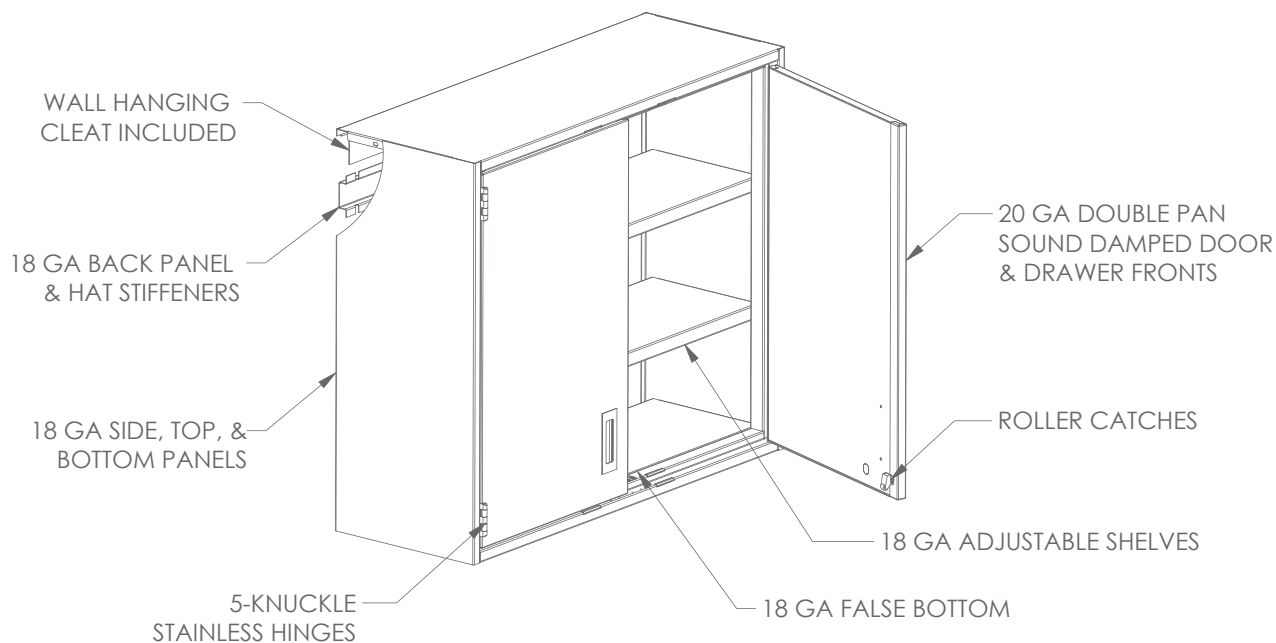

SPECIFICATIONS

Base Cabinets

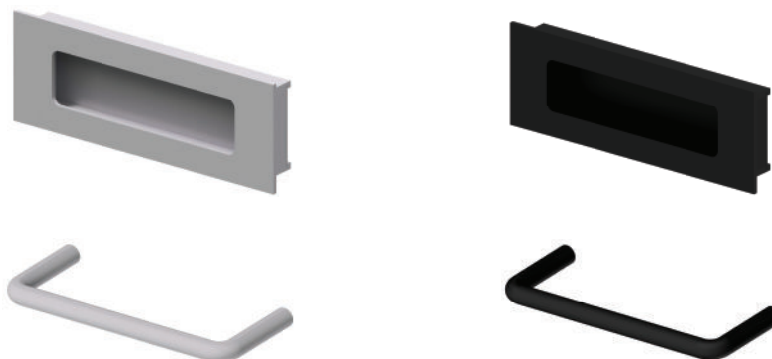

Wall Cabinets

OPTIONS

Pulls

Solid machined aluminum wire or flush pulls with 4" nominal width. Available in matte clear or black anodized finish.

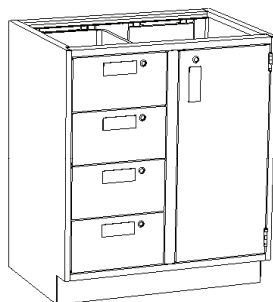

Fronts Style

Door & drawer fronts available in flush inset style. Architectural overlay style coming soon.

Locks

All cabinets may be equipped with 5 disc tumbler locks available in various keying configurations.

PHENOLIC RESIN COUNTERTOPS

Phenolic resin is well suited to numerous industrial and laboratory applications. Phenolic resin is a non-absorbent, moderately chemically resistant, heat resistant, moisture resistant, easy to clean, extremely hard material.

 BLACK GRAY WHITE

EPOXY RESIN COUNTERTOPS

Epoxy resin offers the highest and most trusted standard in chemical resistance, including corrosive chemicals, as well as very high temperature tolerance. Epoxy is extremely strong and long lasting, and is now available in a wide variety of custom cuts and colors.

 BLACK GRAY WHITE

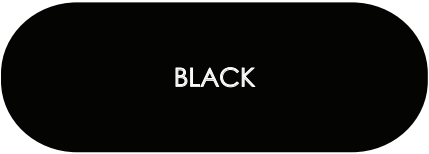

STAINLESS STEEL COUNTERTOPS

Stainless steel is recommended in carbon-based chemical labs, clean rooms, and specialty settings. Stainless is easy to clean and non-absorbent, so it has no pores or cracks to harbor dirt, grime, or bacteria. Attractive and requires minimal care. Stainless steel is the greenest material Formaspace carries due its infinite design lifetime and 100%, low-energy recyclability.

 STAINLESS STEEL

HIGH DENSITY POLYETHYLENE (HDPE)

Despite its tough sounding name, high density polyethylene (HDPE) is soft compared to other surface materials. That makes it great for working on soft or delicate products which may scratch against harder surfaces. HDPE is often used in laboratory environments due to its lack of porosity and resistance to many solvents.

A solid black rounded rectangular sample of HDPE material.

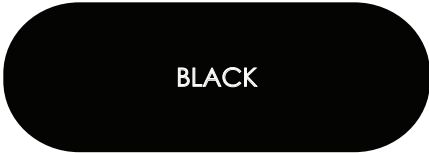

BLACK

A white rounded rectangular sample of HDPE material with a thin blue border.

WHITE

LAMINATE COUNTERTOPS

Standard laminate is a good all-around surface material, which we supply with a 3mm PVC edge banding. Our standard laminates are laid over a high density engineered substrate using environmentally sensitive adhesives.

A solid black rounded rectangular sample of laminate material.

BLACK

A solid gray rounded rectangular sample of laminate material.

GRAY

A white rounded rectangular sample of laminate material with a thin blue border.

WHITE

CHEMICAL RESISTANT COUNTERTOPS

Please note that the comparisons mentioned here were compiled based on product information available from product brochures and manufacturer test results applying different chemicals. Formaspace did not perform any tests under similar conditions to compare the countertops listed below.
