

We've been working with lab managers and lab architects since 1981, and we design and manufacture made-to-order furniture for every lab's unique requirement. In addition to modular lab benches, the casework is one of the main players when furnishing a lab, as they go along the wall and offer a stable solution to any lab application.

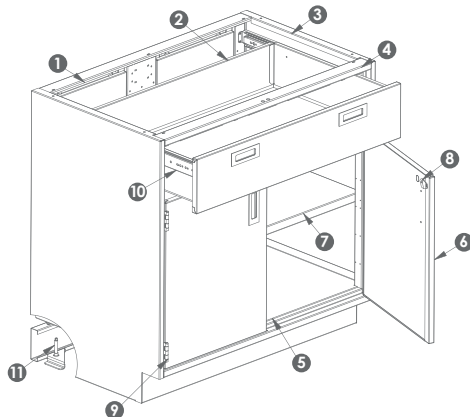

At Formaspace, the casework offerings can be fabricated to industry-standard sizes and made to fit equipment, tools, shelving, and technology. The casework can be built with steel and the choice of powder coating finishes.

Contact us today for your next casework project.
