

Formaspace for What's Next.

Super-duty shelves support up to 300 lbs.

Wide variety of task-specific work surface options.

Adjustable surface heights increase productivity, reduce stress-related injuries, and meet ADA requirements.

Wide variety of stock and custom accessory options maximize productivity and make your workspace uniquely "you."

Heavy duty 16-gauge tubular steel frame will last a lifetime.

Full tubular steel subframe will stand up to whatever's next in your workspace.

Choice of ergonomic chairs backed by industry's most comprehensive warranty.

Formaspace advances the spirit of discovery and creation through the design and manufacture of custom technical furniture, accessories, and services. We develop elegant, practical, flexible solutions for customers in laboratory, technical, and industrial environments.

Innovation

We design workspaces to precisely meet customers' evolving needs.

Design

Our workstations are objects of industrial beauty.

Ergonomics

Our benches, chairs, and accessories are designed to create healthy working environments.

Environmental Sustainability

We strive to create and encourage environmental sustainability.

Social Responsibility

We are committed to maximizing human potential and contributing to the global community.

Tech Lab

Imagine a laboratory built for today's needs as well as the future: It would have to offer total flexibility for frequent reconfiguration, rugged durability to withstand high volume testing and production, and static discharge options meeting increasingly sophisticated requirements. Formaspace labs are designed with all these needs in mind.

- Electrostatic dissipative (ESD) laminate
- Grounding kits
- Monitor arms and CPU brackets
- ESD shelving
- UL approved power options
- Lighting options
- Storage options

Wet Lab

Formaspace will design wet labs to your custom requirements with the industry's best materials so you can focus on the science of discovery and testing. Our labs are designed with the future in mind, with flexible options ensuring you can meet today's needs as well as those of tomorrow.

- Epoxy resin surfaces in a wide variety of colors and styles
- Phenolic resin surfaces
- Chemical resistant laminate surfaces
- Sinks
- Fume hoods
- Gas valves
- Much more

Material Handling / Light Industrial

Formaspace offers efficient, integrated packaging solutions for high throughput and maximum efficiency in a wide variety of material handling situations. All our benches are fully custom, so your workers will never have to reach outside their immediate work area to complete common tasks. It's all part of the Formaspace solution.

- Ball transfer, skate wheel, and conveyor options
- Bin rails
- Storage options
- Recessed scales
- Custom cubby and other storage options
- Roller bars
- Shelf dividers
- Monitor arms

Heavy Industry

Formaspace heavy industrial workbenches are designed for rock-solid durability, so whatever your task, Formaspace products are tough enough to stand up to what's next.

- Maple
- Galvanized steel
- Stainless steel
- Super-duty custom construction options
- Bin rails
- One-of-a-kind accessories

Features & Benefits

Formaspace electronics lab benches offer total customization for specific applications, flexibility for what's next via casters, six-sigma ESD options, and modular components, and the durability of high strength tubular steel frames and components for frequent retasking. Formaspace offers a variety of human-friendly height adjustment options to aid retasking and reduce the risk of repetitive stress injuries.

Simple, elegant Formaspace designs ensure timeless appeal. A variety of worksurface options ensure flexibility, durability, and task-specificity. Formaspace design consultants will help you design clean workflow layouts to ensure you have a productivity edge on the competition.

Formaspace custom designs offer the ultimate in task-specific workflow efficiency to keep you ahead of the competition. Formaspace super-duty construction ensures your benches will last well beyond our industry-leading warranty.

Formaspace benches and fully custom equipment can be designed for a wide variety of one-of-a-kind needs, so you can order all your specialty equipment in one convenient place. Formaspace has designed benches to hold 25,000 pound or more for the ultimate in durability.

Formaspace meets export requirements worldwide, so wherever business takes you, you can always trust Formaspace for what's next.

Functional | Formaspace technical furniture is customized to your task-specific needs. We will help you design furniture to your requirements from whatever format you provide, from back-of-the-envelope sketches to AutoCAD files. Our technical staff will answer your questions and design around technical issues, ergonomic considerations, environmental impact, ADA compliance, and material data safety (MSD) requirements at your request. If you are unsure of some aspect of your requirements, our staff will help ask the right questions to help you form your space.

Durable | 80% of Fortune 500 companies rely on our durable, fully welded workstations. Formaspace backs its products with an industry leading 12-year, three shift warranty.

Made In the USA | Right down to the bolts, all of our core products are 100% Made in the USA.
